PROJECTS

Multi-Tier E-Commerce Web Application

1 Months

Designed and deployed a **highly available, scalable**, and **fault-tolerant** e-commerce platform on AWS. Implemented **3-tier architecture** with load balancing, auto-scaling, and database integration. Optimized content delivery using **cloud storage and CDN**, ensuring **low latency and global availability**. Enabled **real-time monitoring and alerts** to maintain performance and reliability.

Batch Data Processing System

3 Weeks

Developed a **data processing workflow** to handle large datasets on AWS. Automated periodic data ingestion and transformation using compute resources, with processed results stored in **NoSQL and cloud storage** for analytics. Configured **monitoring and alerting** to track performance and optimize resource utilization, ensuring **cost-effective and reliable batch operations**.

CI/CD Pipeline for Web Application

1 Months

Implemented a **continuous integration and deployment pipeline** on AWS to automate build, test, and release processes. Integrated **version control, build automation**, and **deployment orchestration** to achieve **zero-downtime** deployments. Enhanced software delivery by enabling **faster releases, reduced manual effort**, and **improved reliability** with proactive **monitoring and notifications**.
